

Real-time and comprehensive visibility into every batch and every shift

No more guesswork or production in the dark – Factbird gives you immediate and detailed clarity and shows you what you can do to improve productivity across all sites.

Universal challenges:

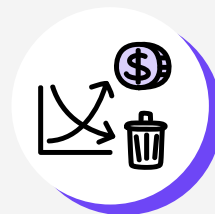

- Poor shop floor visibility prevents effective decision-making
- Siloed systems (MES, machines), non-standardized data
- Expensive, complex automation system to upgrade

Factbird delivers:

- Real-time analytics across sites — OEE, downtime, scrap and throughput
- Immediate data capture from diverse sources – PLCs, sensors, cameras
- Intuitive dashboards and reports on one platform – from shop floor to top floor

Your results:

- Boosted OEE and throughput and prevented downtime
- Reduced waste and scrap, enhance quality
- Fulfilled orders using fewer resources
- Improved profit margins

Production Insights

“With Factbird, we’re analyzing and identifying where we’re losing efficiency. We take action to prevent those issues from recurring the next week or month. Having that insight and knowing exactly where to act is incredibly valuable, and Factbird provides that.”

– Roberto Marquez, Plant Manager at Raymundos
