

FACTBIRD

Increase productivity and reduce waste with manufacturing intelligence

19 %
Productivity
increase

9 points
OEE uplift

Achieved in the first 90 days on average, using Factbird.

When decisions depend on gut feelings and old spreadsheets, real improvement becomes almost impossible. Factbird® delivers clear insights and intuitive digital tools to run your production with confidence.

With Factbird's Manufacturing Intelligence suite, you can see what is happening on every line in real time. Spot losses early, compare shifts and sites on the same facts, and turn production data into clear performance insights. The system connects your production data to digital workflows, helping teams identify root causes faster, sustain improvements, go paperless, and scale digitalization without heavy IT lift.

One suite, multiple benefits

Factbird's Manufacturing Intelligence suite is built for the shop floor. It brings together apps, data-capture devices, and insights in one system, so you can manage performance, data, and workflows without juggling scattered tools.

- Streamlined complexity with a single system
- Simple to deploy and easy to keep running
- Ready to scale from one line to multiple sites

FACTBIRD

Production Insights

**Know what's happening.
Improve what matters.**

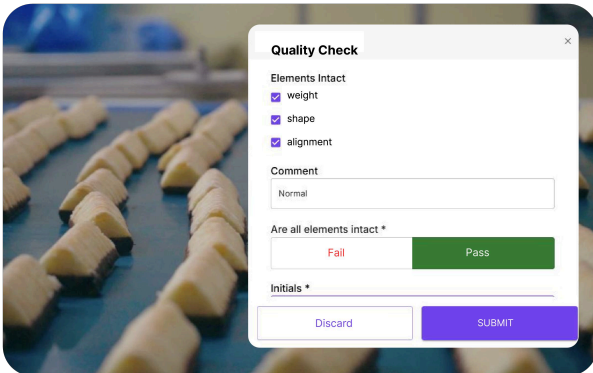

Get real-time, detailed visibility into performance so you can boost productivity. Spot losses early, understand why they happen, and focus your efforts on the improvements that make the biggest impact.

Connected Operations

Go paperless, cut admin, and streamline compliance.

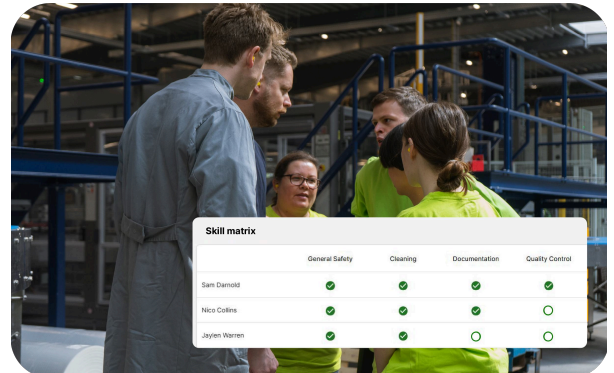

Keep front-line teams on top of daily operations with AI-powered workflows for guidance, quality, maintenance, and follow-up.

Knowledge Excellence

Build skills and drive continuous improvement.

Develop your workforce and processes in a structured way, and keep operations running smoothly with the right skills in the right place.

Global operations, in 30+ countries, with offices in the U.S. and Europe.

Trusted by 350+ manufacturers to elevate shop-floor performance.

Improving production for manufacturers worldwide since 2016.

Trusted by manufacturing leaders
