

## ACTION PLANS

# Help your team solve problems and improve faster.

Streamline improvement by digitizing PDCA (Plan-Do-Check-Act) problem solving with the Factbird Cloud App.

Connect production analysis to action, help your team quickly solve problems, foster collaboration across departments, and centralize expertise in the cloud.

Get everyone on the same page with data-driven improvement activities across departments.

Digitize problem-solving tasks and continuous improvement activities for more visibility and efficient task management.

Preserve problem-solving expertise in the cloud to avoid knowledge loss and increase efficiency across sites.

## Digitize problem solving

Factbird Action Plans is a project and task management tool designed for continuous improvement. Use the PDCA method for problem solving alongside Factbird's production monitoring and analysis tools.

## Data-driven continuous improvement

You can create improvement activities directly from the automatically generated downtime analysis charts in Factbird, identify root causes, plan countermeasures, engage departments, and empower your team.

### Use case examples

- **Digitization and visibility:** Manage action plans in Factbird to gain visibility of all improvement activities. It will soon become a central part of your daily or weekly performance meetings.
- **CI management:** Drive fact-based continuous improvement by connecting Factbird's downtime analytics with actions. Utilize the reminder and escalation features to follow up on initiatives.
