Factbird powered by Kepware

Connect your PLCs to Factbird cloud using Kepware for scalable connectivity.

Expand the power of Factbird with Kepware by connecting diverse automation devices to Factbird Cloud via MQTT.

Securely and seamlessly integrate data from various machine controllers and production processes into Factbird Cloud, creating a unified manufacturing intelligence platform.

Data from factory floor

process parameters | stop reasons | counts | batches

Scalable connectivity supports full site and multi-site rollout of Factbird.

Fast integration of OT devices (PLCs) with Factbird cloud software.

Leverage data from automation devices in Factbird cloud software to drive digitization.

How to connect:

Step ① Install Kepware including KEPserverEX, IoT gateway module and relevant drivers on your server.
Step ② Configure Kepware by selecting data points to forward to Factbird Cloud and connecting PLCs.
Step ③ Configure Factbird by creating lines, mapping stop reasons, etc.
NB If you already have Kepware in place, start from step ②.

Comparison:

	Factbird - Kepware	Traditional on-premise solution
Fast implementation and scalability	✓	✗
Access to data from diverse brands of PLCs easily	✓	Custom project
Constantly improving cloud analytic software	✓	✗
Security measurement	Encrypted MQTT, AWS cloud security, Private cloud option	Managed by customer
