

FACTBIRD

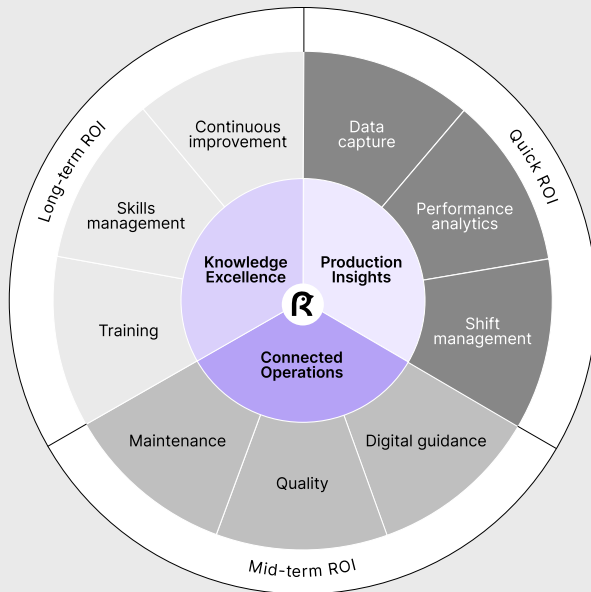

**Data simplified.
Decisions amplified.**

Cut through complexity and transform your organization with solutions that are easy to deploy and quick to bring results. Factbird helps you to engage frontline workers, reduce waste, and increase efficiency.

Trusted by the world's best

A manufacturing intelligence solution that helps you optimize your shop floor operations.

- **Quick time-to-value:**
Deploy our plug-and-play solutions in a few short hours without disrupting your operations.
- **Lightweight suite:**
Eliminate the need for multiple systems, reducing complexity and improving scalability.
- **Shop-floor expertise:**
Practical solutions for the shop floor that benefit your entire organization.
- **Proven results:**
Customers improve OEE by 25% and reduce costs by 14% on average over the first 365 days.*

*Based on customer data, between June 2016 and December 2022

Production Insights

Factbird's Production Insights increase visibility and offer actionable analysis, empowering you to make swift, informed decisions to boost efficiency.

Data capture: Streamline capture of multi-source industrial data with plug-and-play devices, PLC integration, OPC UA connectivity, and more.

Performance analytics: Enjoy real-time production monitoring for better decision-making, from multi-site OEE overviews to line-specific downtime analysis.

Shift management: Plan your production schedule with real-time data to meet delivery deadlines and reduce idle time.

Connected Operations

Empower your frontline workers with intuitive digital tools that unlock their full potential. Factbird's Connected Operations help you go paperless by digitally standardizing shop-floor processes.

Digital guidance: Stop using paper or static files. Make standard operating procedures convenient to update and share with frontline operations.

Quality: Improve agility and efficiency in production by linking quality management to operations for in-line quality checks.

Maintenance: Bring reactive, preventive, and predictive maintenance capabilities into one shop-floor system, enabling better collaboration between teams.

Knowledge Excellence

Factbird's knowledge management and operational excellence tools help you take a systematic approach to personal development and process improvement for sustainable change.

Training: Develop skills with training programs that set up your teams for success and reduce employee turnover.

Skills management: Make sure you have the right skill profiles available to manage tasks and identify gaps.

Continuous Improvement: Use digital continuous improvement and variation control tools to systematically improve.

Professional Services

Accelerate operational improvements with Factbird's professional services.

OEE training: Turn OEE insights into valuable outcomes faster with on-site training for operators and leaders.

Lean management training: Enhance your operational efficiency with hands-on lean management training.

Productivity Kaizen Blitz: Our lean experts facilitate an intensive workshop to rapidly uncover productivity enhancements.

Tailored solutions: We work closely with your team to develop tailored solutions for your operational challenges.

About Factbird

Factbird is a trusted leader in manufacturing intelligence, offering easy-to-deploy production insights, connected operations, and knowledge excellence solutions. With roots in the shop floor, Factbird helps manufacturers around the world increase productivity and stay competitive in a rapidly evolving world.

2016

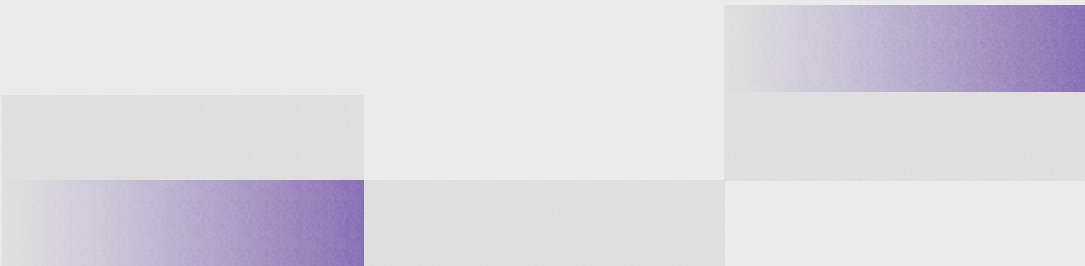

Founded.

Proven success

Improve effectiveness:

“ We’ve gone up about 20 points in OEE overall, across all of our equipment.”

Roberto Marquez, Plant Manager

Increase throughput:

“ I would have to say, if you look at a measure for it, our pieces per hour is up by about 20 to 25%.”

Lorne Day, VP of Operations

Accelerate decision-making:

“ It’s much much easier to aggregate data; collect, combine, and analyse afterwards.”

Anders Holmström, Factory Manager

Reduce waste:

“ Factbird translated into almost a 10% reduction in waste.”

Johnnie Greene, VP of Operations
