FACTBIRD

Seamless operations start with the right skills

Skill gaps and workforce shortages are becoming the norm. Onboarding takes too long, tribal knowledge disappears when people leave, and without true visibility into team capabilities, fulfilling orders is at risk.

Universal challenges:

- Order fulfillment is challenged by workforce shortage and skill gaps

- Onboarding and upskilling rely on whiteboards and paperwork

- Training progress is untracked, making it difficult to close critical gaps

Factbird delivers:

- Structured onboarding and training in one digital system

- A skills matrix that helps you plan based on actual team capabilities

- Automated follow-ups and a digital workflow make onboarding and training faster and easier to manage
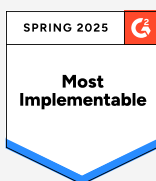

Your results:

- Faster onboarding and upskilling

- Improved safety, compliance, and process stability

- Higher frontline engagement and retention

- Improved order fulfillment

Knowledge acceleration

FACTBIRD

" We're in a world of efficiency. We're in a world of dog-eat-dog, and there's always someone less costly out there because they're better than you. And the reason why they're better than you is that they have a tool that they use better. Everything we do is about operational excellence."

– Lorne Day, VP of Operations, at Wozniak Industries, Inc

SPRING 2025 **High Performer**

SPRING 2025 **Most Implementable**

SPRING 2025 **Fastest Implementation**
